

Germany - current practice (1)

Typical situation in a German port with PCS (port level)

Germany - Current practice (2)

PCS – NCA – SSN (national level)

ZMGS = central reporting point

NCA = National competent authority

The National Single Window Concept

Directive 2010/65/EU – „reporting formalities“

- Harmonization and standardization of notification procedures
- Submission of data through one „National Single Window -NSW“
- All data are to be provided by file transfer (EDI) or to be entered into a web module (electronic notification)
- Redundant data required by various authorities shall be required only once from the notifying party and disseminated by the NSW system
- Relevant data shall be made available to competent authorities for electronic data procession (EDP)
- notifying parties are
 - ship owner (e.g. for ship details)
 - carrier (e.g. for cargo details)
 - ship master or agent (e.g. for waste and health declaration)

What has to be notified?

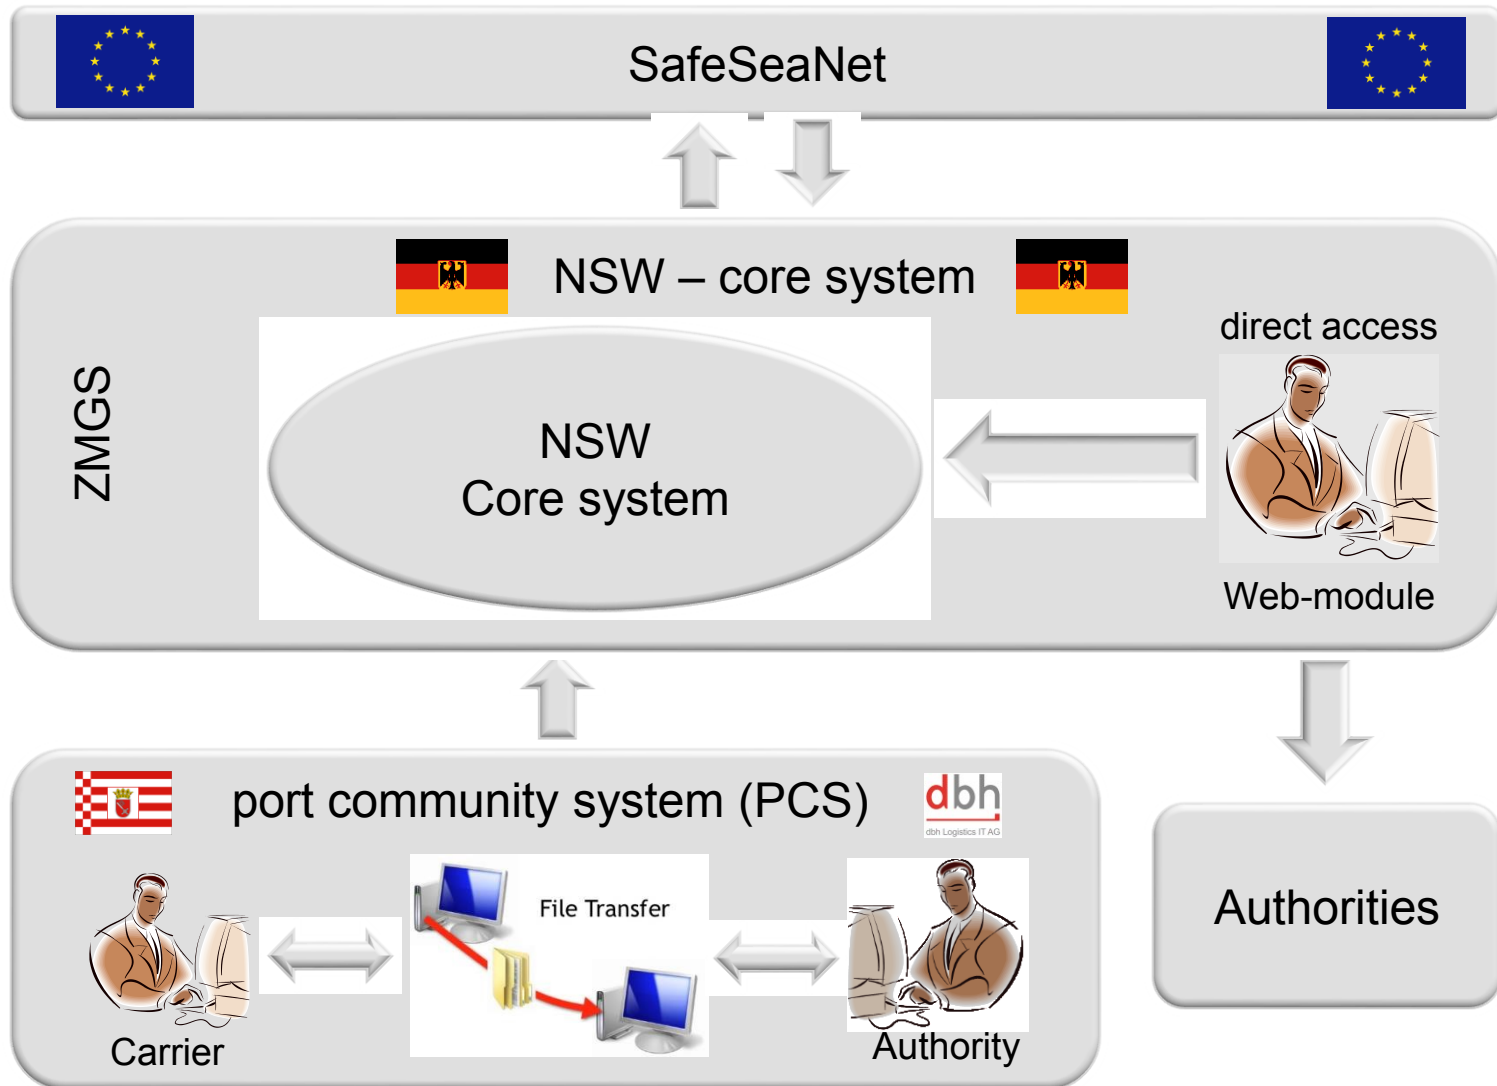

Required data

- FAL-FORM 1: notification of arrival – harbour master
- [FAL-FORM 2: notification of goods] – customs
- FAL-FORM 3: ship stores – customs
- FAL-FORM 4: crew effects – customs
- FAL-FORM 5: crew list – federal police
- FAL-FORM 6: passenger list – federal police
- FAL-FORM 7: dangerous goods – harbour master
- Annex 1: security declaration – federal police
- Annex 2: waste notification – harbour master
- Annex 3: maritime declaration of health – port health

What has to be notified?
